

amplify it. We've stood apart in a sea of look-alike vehicles by championing the un-boring; by having the courage to be different enough to build modern-day marvels that are engineered with more passion, precision and performance than ever before.

each vehicle beg to be taken out on the open road. It's time to put the pedal to the metal. THIS IS WHAT IT MEANS TO BE DOMESTIC AND NOT DOMESTICATED.

DODGE SRT HELLCAT® // It doesn't just look more badass, it is more badass. Challenger SRT Hellcat pays homage to some of its most iconic predecessors with a new hood featuring two fully functional air-sucking snorkels. The large gulps of air allow the beastly Supercharged 6.2-liter SRT Hellcat HEMI® V8 engine to add 10 more horses to its stable, bringing the total horsepower to a whopping 717 (656 lb-ft of torque). Challenger SRT Hellcat also slurps air into the engine's air box via the lit Air-Catcher® headlamp inlet port located in the driver's-side parking lamp. A 92mm throttle body controls airflow into the Supercharger and air charger coolers, and then into the inlet port. The Supercharger houses internal charge coolers and an integrated electronic bypass valve. The twin-screw rotors are specially treated to accommodate tighter internal tolerances between the rotors and help improve overall performance.

Both Challenger SRT Hellcat and Charger SRT Hellcat (717/707 horsepower, 656/650 lb-ft of torque) run a staggering quarter-mile time and are arguably two of the most coveted performance vehicles on the road. These powerhouses use upgraded components that can withstand the brutal performance they are capable of unleashing. The SRT® tuned Bilstein® three-mode Adaptive Damping Suspension system on both models provides driver-selectable settings to include: Street (Auto) Mode = sporty but compliant ride; Sport Mode = firm, maximum handling; Track Mode = firm, maximum handling plus performance shifting and a gear-holding feature to suit any driver's needs. The SRT Drive Modes, which are accessed via the 8.4-inch Uconnect® touchscreen, offer selectable settings for Street (Auto), Sport and Track. There is also a custom setting that allows drivers the ability to tailor their experience by individually adjusting horsepower, transmission shift speeds, steering effort, paddle shifters, traction and suspension preferences. The standard SRT Performance Pages bring critical vehicle performance data to the driver's fingertips, while race options give the driver the ability to access Launch Control, Shift Light and Line Lock, which is new for 2019.

TRACK-PROVEN TUNED CHASSIS High-demanding track conditions require tightly engineered hardware. Challenger R/T Scat Pack showcases a high-performance tuned chassis that's ready to go.

SHOCK ABSORBERS Available Bilstein® high-performance shock absorbers are precision-damped to help provide a confident, smooth ride for the everyday commute while still being capable for weekend track duty.

SUSPENSION Options range from sport-tuned to high-performance to the top-of-the-line competition suspension featuring adaptive damping. A bold combination of movement and staying power comes from a sophisticated suspension geometry and rear-wheel drive (RWD). Whether it's the everyday commute or more challenging driving situations, the independent 5-link rear suspension is finely tuned to help provide exceptional handling and a comfortable ride. When the rubber meets the road, a lower unsprung mass helps maintain better tire contact with the ground and reduces road noise. Models equipped with a 392 HEMI® V8 engine feature unique suspension geometry that helps improve balance, cornering ability and steering responsiveness. Exclusive Bilstein shocks and a lowered suspension allow these performers to achieve 0.93g on the skid pad. The Bilstein Three-Mode Adaptive Damping Suspension, available on Challenger R/T Scat Pack and standard on all SRT Hellcat® models, offers different suspension firmness settings from Street Mode (sporty) to Sport Mode (firm) to Track Mode (firmest max handling).

AGGRESSIVE FRONT- AND REAR-CAMBER GEOMETRY Performance handling requires maximum road-holding grip, and Challenger Scat Pack model delivers with aggressive front- and rear-camber geometry. Set at -1.2 degrees in the front and -0.75 degrees in the rear, Challenger is set up for high-speed cornering with its tires leaning inboard at the top relative to the body.

BRAKES Standard 4-wheel antilock disc brakes provide solid stopping power. Available Brembo® performance brakes feature vented rotors that provide superior braking performance when paired with wind-tunnel-designed brake ducts.

WEATHER OR NOT, HERE WE COME // Designed for uncompromising performance, Challenger all-wheel drive (AWD) and Charger SXT AWD deliver massive control exactly when you need it. The advanced automatic front-axle disconnect technologically, intuitively and seamlessly transitions between rear-wheel drive (RWD) and AWD without driver intervention. Under normal driving conditions, the front axle is disengaged and 100 percent of the engine's torque is directed to the rear wheels. When sensors indicate more traction is needed, the system automatically engages the front axle and instantly transitions to AWD mode.

These systems work with the vehicles' Electronic Stability Control (ESC)^[1] system to deliver precise front-to-rear torque control while preserving Challenger and Charger's unrelenting drive. Challenger AWD also employs Vehicle Dynamic Control (VDC), which provides exceptional traction on slippery surfaces while helping the driver maintain the desired vehicle path. (AWD is available on Challenger GT.)

SAFETY & SECURITY FEATURES

PARKVIEW® REAR BACK-UP CAMERA^[2] // This system displays the area directly behind your vehicle when the vehicle is in Reverse. Dynamic grid lines adjust with steering input to assist in parking. Standard on Charger and Challenger.

PARKSENSE® REAR PARK ASSIST^[2] // When your vehicle is in Reverse and moving at a low speed, the system can detect objects in your vehicle's path. When sensors detect objects in the back-up pathway, the system provides an audible and visual warning. Standard on Charger, available on Challenger.

BLIND SPOT MONITORING (BSM)^[3] WITH REAR CROSS-PATH DETECTION^[2] // Dual radar sensors constantly monitor driver blind spots, providing notification of an encroaching vehicle via illuminating icons in the sideview mirrors and by audible chime. The system includes Rear Cross-Path Detection^[2] which monitors for vehicles and objects in perpendicular relationships to the vehicle while backing out of parking spots or driveways. Available on Challenger and Charger.

ADAPTIVE CRUISE CONTROL (ACC)^[4] // Automatically adjusts vehicle speed to maintain desired distance from the vehicle ahead. Available on Challenger. On Charger, this available system can bring the vehicle to a full stop without driver intervention.

FULL-SPEED FORWARD COLLISION WARNING (FCW)^[5] WITH ACTIVE BRAKING^[6] // Radar and camera technology combine to alert you when the system senses potential frontal impact. If you're not able to respond quickly enough, the system will automatically engage the brakes with the ability to bring the vehicle to a complete stop. Available on Charger. On Challenger models, the available FCW^[5] transmits audible and visual warnings only. Warning sensitivity can be adjusted to driver preference.

LANESENSE® **LANE DEPARTURE WARNING (LDW) WITH LANE KEEP ASSIST**^[7] // This system measures your position within lane boundaries. If it detects an unintentional lane drift, it will alert you and correct the vehicle back into the lane. Available on Charger.

ELECTRONIC STABILITY CONTROL (ESC)^[1] // This system is designed to assist the driver in maintaining control of the vehicle when a loss of traction is detected. ESC^[1] senses when a vehicle loses steering control and attempts to correct the vehicle's course by automatically applying the brakes at individual wheels. Standard on Charger and Challenger.

RAIN-SENSING WINDSHIELD WIPERS // System sensors automatically detect moisture on the windshield and activate the wipers. Available on Challenger and Charger.

READY ALERT BRAKING // The system anticipates situations when you might initiate an emergency brake stop and uses the ESC^[1] pump to precharge the brake system in order to decrease the time required for full brake application. Standard on Challenger and Charger.

RAIN BRAKE SUPPORT // When your car's windshield wipers have been activated, the system pulses the brake pads closer to the spinning rotors, helping to keep the rotors and pads dry for greater control and operator security. Standard on Challenger and Charger.

HERE'S WHAT YOU CAN DO. REMAIN FOCUSED ON

THE ROAD WITH YOUR HANDS ON THE WHEEL, WHILE YOU COMMUNICATE, NAVIGATE SAND STAY ENTERTAINED.

// LISTEN to music, talk shows and sports. Access all genres, favorite artists, winning teams - all the time // DISCOVER new places, find the best shopping, dancing, entertainment venues and restaurants // SPEAK UP and be heard and send and receive calls and texts^[9] while driving safely with handsfree phone capability[10] // NAVIGATE[8] to every adventure and get turn-by-turn directions so you don't get lost on the way (unless you want to) // START[11] your car from afar, or lock your doors from almost anywhere using your smartphone — thanks to Uconnect® services

APPLE CARPLAY®[12] COMPATIBILITY

This is smarter iPhone® integration, so you'll experience your favorite features through your dashboard. With Siri, [9[13] all you have to do is ask — catch up on calls and messages, get directions from Apple Maps, or request a song through Apple Music. The system lets you browse music or discover nearby gas stations, parking, restaurants and more. Plus, Maps help predict where you're headed.

ANDROID AUTO®[14] INTEGRATION

For those who know and love Android,™ Google™ goes with you with navigation (8) and "OK Google" voice detection, and you'll hear your favorite Google Play music and get voice-guided navigation[8] from Google Maps. Stay focused and productive while on the road with voice controls[10] that allow you to make calendar appointments, set timers, reply to emails and messages - and more.

PARTS AND ACCESSORIES

Fitting genuine parts is important for many reasons, including vehicle longevity and maintaining residual values, so our dealers always offer official Mopar parts. When it comes to accessories, we offer both the full spectrum of original Mopar products, plus a range of high-quality items from selected suppliers.

WARRANTY

PLATINUM PROTECTION FOR YOUR NEW DODGE

AGT Platinum Protection is the warranty program offered for every new Dodge vehicle by AGT Europe Automotive Import SA. This plan offers you the best coverage assistance thanks to a network of certified expert technicians all over Europe.

2 YEARS / 100'000 KM

- VALID IN EUROPE
 Same warranty system for all AGT dealers
- TRANSFERABLE
 Does not expire in case of new owner
- EXTENDABLE
 Up to 5 years or 150'000 KM
